PRODUCT STRATEGY 2026-2028

Make every wager meaningful.

One connected experience. Be the best of the best.

Master draft · Built from the Lisbon workshop and the product team's strategy submissions · October 2026

01 · THE WORLD CHANGED

Prediction markets now reach every state, and they are spending like nobody else can.

50
US states reached, including ones no regulated book can sell in

$750M+
put into prediction markets in 2026 by DraftKings and FanDuel. FanDuel's runs on CME Group event contracts

~$2B
committed by ICE to Polymarket

~$22B
Kalshi valuation

Source: Online Wagering Strategy 2026 (v6), CRO

02 · THE CORPORATE VISION

So we chose our battlefield.

We do not fight prediction markets head on.

CASINO FIRST

Casino earns 2x+ what sports does

The BetMGM playbook. Only 7 US states regulate online casino, and only 3 are big.

SPORTS IS THE FUNNEL

~75% of casino players come in through sports

The brand was built on sports. If we weaken sports, then we'll weaken casino.

REWARDS ARE THE PRIORITY

The one thing an exchange cannot give

The predictive markets cannot offer rewards, but we can reward every wager.

Source: Online Wagering Strategy 2026 (v6). CRO

03 · WHY NOW

The biggest opportunity we have ever had.

~17M
Americans projected to use prediction markets in 2026

5x
growth in Kalshi active traders in 2025, from 240K to 1.2M

~3M
new Kalshi users in one tournament, the World Cup

3x
first-time online bettors this summer vs January

WHO THEY ARE

3x crypto
use vs the typical American. About 90% male

58%
of Kalshi volume is parlays. They want depth and longshots

90%+
of Kalshi activity is sports. A sports crowd we can win

And they cannot sell them: a casino | deep props and same-game parlays | a single reward

Sources: Product Strategy session, October 2026. ELI Report; Sacra (estimate); Kalshi company data; Bank of America Institute (all online betting); CNBC/Dune, Sep 2026

04 · THE AMBITION

Be the best of the best.

The best casino and sports platform in the industry. **Not the best offshore book. The best.**

> *"...to reset the bar for what it means to be an absolutely excellent company."*
>
> LUCA FERRARI · CEO, BENDING SPOONS

> *"If you do the very same things everybody else is doing, you're almost guaranteed to be mediocre."*
>
> LUCA FERRARI · CEO, BENDING SPOONS

We want to build the best product, and the best company, in the world.

Inspired by the Bending Spoons podcast · Quotes: Luca Ferrari, CEO of Bending Spoons, in his interview with Endeavor

The product strategy.

Built in Lisbon. Tested against the data.

LISBON · 28 SEPTEMBER TO 1 OCTOBER

We tested our theories against the data.

01 · WHAT WE BELIEVED

5 hypotheses

1. Activation is the biggest win
2. Rewards only work as one system
3. Someone else is creating our next customer
4. Content problem or discovery problem
5. Trust is a experience

›

02 · HOW WE TESTED THEM

11 research workstreams

- A The journey audit
- B Activation analytics
- C The causal test
- D Player base composition
- E Content and site audit
- F Competitor benchmarking
- G Voice of the player
- H Platform capability
- I The upgrade audience
- J Account protection and churn
- K Reward economics

›

03 · WHAT WE FOUND

5 verdicts

2 CORE BETS

1. Activation. Faster first bet, stronger week one
2. One reward system. Every wager counts

3 ENABLERS

3. Convert the new audience
4. Fix discovery, not content
5. Make trust part of the product

5 outcomes we will measure

From opinion to evidence. · Sources: workshop boards, research workstreams A to K, strategy submissions

WHAT THE DATA SAID · ACTIVATION

The first hour is won. The first week is lost.

73%

of casino players place their first casino bet within an hour of signing up, funding included

50%

of first-time depositors who bet in hour one have also dropped off by the end of week one

+26%

larger deposits from players who deposit the day they sign up, and up to 25% likelier to reach VIP

Speed matters and immediate retention matters. Casino players activate faster and they are worth more. Re-activation before the drop off is how we win the first 7 days.

Sources: Activation analytics (workshop research); Optimove research across 20 real-money gaming operators

WHAT THE DATA SAID · THE JOURNEY AUDIT

We timed every step to the first casino bet.

JOIN

~1:30

and 6 fields to sign up. Peers: 45 to 55 seconds

FUND

~6 min

for BTC funds to arrive, after 3 clicks to copy an address

DISCOVER

~50s

to discover casino at all

FIRST CASINO BET

~8 min

and 8 clicks from cleared deposit to first casino bet. Most peers: 30s to 1:30

4 of 5 competitors offer another way to sign in. We do not.

2 of 5 push a first deposit right after sign up. An open lane for us.

Sources: Product Strategy Journey Audits 2026 · Competitor Benchmarking 2026 · Rainbet, Winna and Whale.io sign-up and KYC policies (Oct 2026) · Mitek, 10 gaming operators · Signicat, 7,600 consumers (2022)

WHAT THE DATA SAID · REWARDS AND DISCOVERY

BOL offers more rewards, but with the smallest spotlight.

The biggest promo portfolio

We offer more than Winna, Rainbet and Stake. But poor discovery means players never see most of it.

No urgency on rewards

We think in days, weeks and months. Competitors give players something to claim every few minutes or hours.

Rewards part of the experience

Rainbet leads its homepage with rewards and a countdown. Whale.io puts daily cashback in the lobby.

Rewards need to be part of the experience, not buried in the Promotions tab. Put them where players already are.

Sources: Product Strategy session

05 · THE PRODUCT VISION

Every wager is doing more.

Through one connected experience, we get players from frictionless onboarding into their first casino bet fast, then create the hook that keeps them engaged.

We make it rain rewards, surface personalised content and communicate at every turn, so it is always clear that every wager is doing more.

EVERY WAGER IS

- 01 · Building progress
- 02 · Unlocking value
- 03 · Creating excitement
- 04 · A reason to stay or return

06 · THE HOOK

Casino first. Make it rain.

Two core bets that move the most. Three enablers that make them work. One foundation under all of it.

CORE BET 01 · ACTIVATE

Casino-first activation

Win the first casino bet, then the first 7 days.

CORE BET 02 · REWARD

Make it rain

One reward system, paying out in real-time, minutes and hours, not weeks.

ENABLER · CONVERT

Win new bettors

Welcome them, match their status

ENABLER · DISCOVER

A lobby that fits the player

The right games for each persona

ENABLER · TRUST

Trust as a feature

Trust, built into every screen

Structure from Product Strategy session.

CORE BET 01 · CASINO-FIRST ACTIVATION

Win the first casino bet. Then the first 7 days.

WHY: THE DATA

70% of first-time depositors bet within an hour

50% of those fast starters drop off in week one

~1:30, 6 fields to sign up vs 45 to 55s at peers

~8 min, 8 clicks from cleared deposit to first casino bet

WHAT WE WILL DO

NOW	Fast sign up and first deposit: fewer fields, easier sign up (social login), card deposit in the cashier widget (reduce onboarding time by 50%)
NOW	Starter checklist: shows each step from sign up to first casino bet, then prompts a re-deposit within first 5 days (increase casino first bets/pre-retention)
NOW	Casino-first homepage and lobby, sending players straight into a Casino experience (increase casino activation & engagement)
NEXT	Casino in the welcome offer, staggered over the first days
NEXT	Casino in the sports dead time: half time, pending bets, after settlement

Activation = first casino bet. We measure: time to first casino bet · week 1 retention · 14-day graduation rate

Sources: Agata's, CH's, Kurt's and Dario's strategy submissions; Journey Audits 2026

CORE BET 02 · MAKE IT RAIN

Rewards in real-time, minutes, and hourly

WHY: THE DATA

50% of fast starters gone in week one; casino churns in ~30 days

Biggest promo portfolio in our peer set, and the hardest to find

No holdout group, so we cannot say what rewards return

~9,000 VIP contacts who could not reach a host

WHAT WE WILL DO

NOW	Automate Free spins, on time, every time
NOW	A reward for every onboarding step, and a profile-strength bar
NOW	One shared rewards ledger, so every wager fills one rewards meter.
NOW	Bring rewards into the experience, so the lobby comes to life
NEXT	Instant/real-time rewards win or lose
NEXT	Easier early VIP challenges, and a VIP Watchlist so hosts act on top VIPs in real-time

We measure: time to first reward · reward moments per player per day · casino churn window · NGR lift vs holdout

CORE BET 02 · THE REWARD HEARTBEAT

The bet settles. The relationship moves.

Every bet
Rakeback, cashback, rebate, win or lose

Every hour
The hour becomes our reward unit

Every few hours
Reloads and cash drops that expire

Every day
Races, missions and challenges

Every week
Raffles, draws and races

Every month
Level ups and cash boosts

Earn automatically | **Progress continuously** | **Claim deliberately** | **Return with a reason**

Frequency beats size. Expiry creates the return.

Sources: Agata's strategy submission (cadence); CH's strategy submission (reward experience, hypothesis); Dario's strategy submission

ENABLER · CONVERT · WIN NEW BETTORS

Turn new bettors into BetOnline players.

WHY: THE DATA

~3M new Kalshi users in one tournament. No casino, no rewards

3x the crypto use of the typical American. Crypto is our home turf

Two personas: skills players, and high-risk longshot chasers

We cannot tell where many of our players really come from

WHAT WE WILL DO

NOW Know where every player comes from, and to be found where prediction market players look (SEO/GEO, affiliates, etc)

NOW **Status match:** they tell us their status from their volume elsewhere. We grant it, they prove it with a deposit, then wager volume

NOW Lead with what they can't get from predictive exchanges: deep props, same-game parlays, rewards from the first bet

NEXT Community: players near you, play streams and chat

We measure: FTD conversion from prediction market arrivals · share of status matches proven · first casino bet by persona

ENABLER · DISCOVER · THE RIGHT GAMES FOR EACH PERSONA

A casino lobby that fits the player

WHY: THE DATA

Two personas want very different games: skills players, and high-risk players

~50s just to find casino today

Find before we buy. The problem is finding games, not too few games. We test that before licensing more

The first fit sticks. Players stay with the first kind of game they try

WHAT WE WILL DO

NOW	**Provide a dynamic casino lobby for each persona type**, using games we already have: skill games like blackjack, or fast, big-win games
NOW	Better search and a simpler casino menu, so any game is a click or two away
NEXT	A lobby that knows you: a "For you" row, rows by VIP level, recent games and progress
NEXT	Casino inside the sportsbook, for sports players
LATER	Rewards and quick deposit inside the game itself

We measure: clicks to a casino game · casino play days · different games played · first-session play by persona

ENABLER · TRUST AS A PRODUCT

Trust, built into every screen.

WHY: THE DATA

Competitors put trust signals where players deposit. We put none

14,830 fairness disputes and 12,787 unpaid-win contacts in six months

~16 games of our own. None let players check the result

WHAT WE WILL DO

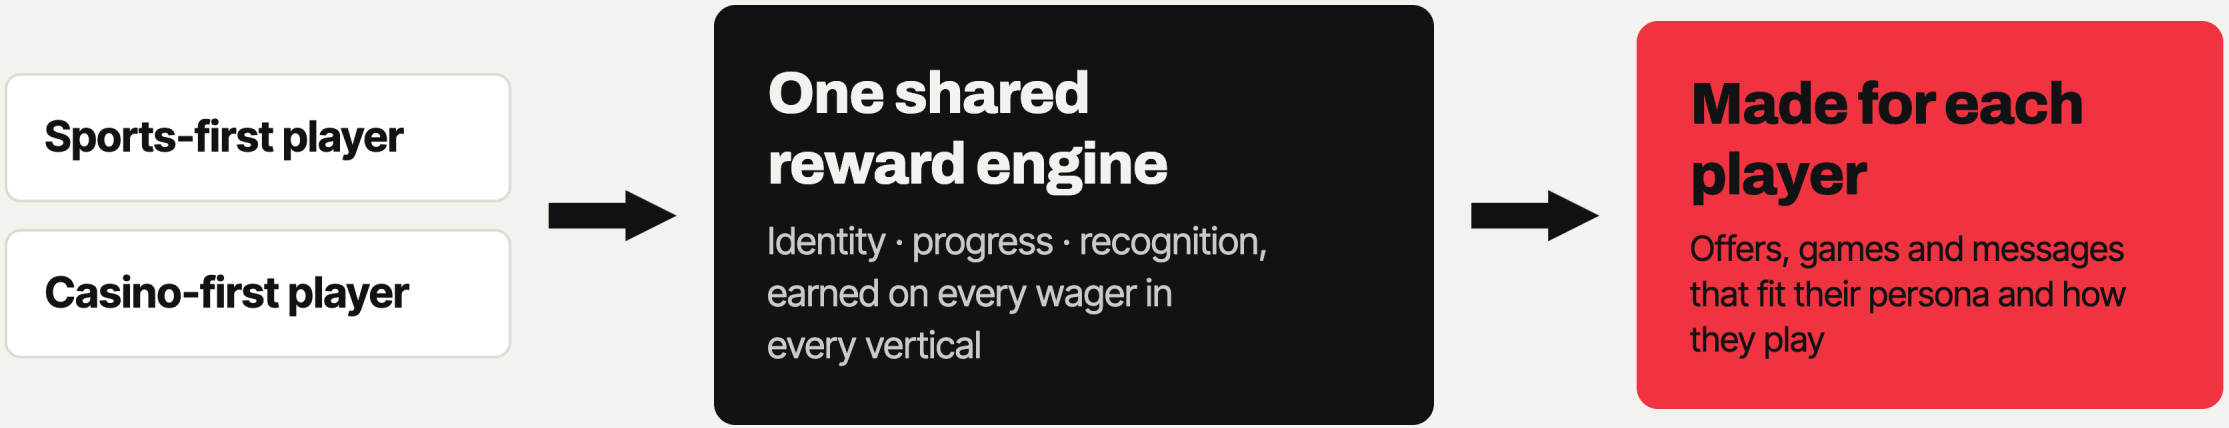

NOW	**Cashier:** trust badges where players deposit (licence, partners, payout record), plus a control-your-spend tool
NOW	**Withdrawals:** live payout status and a published payout time, so players always know where their money is
NEXT	**Casino: Provably Fair** on our own games, and RTP on every slot tile
NEXT	**Withdrawals:** automatic approval for low-risk payouts, and ID checks only when the rules call for them
NEXT	**Account:** phone verification and takeover protection, so winnings stay safe
LATER	**Social sharing:** a live wins feed and a payout receipt players can share

We measure: fairness disputes · unpaid-win contacts · first deposit completion · churn of account takeover victims

ONE CUSTOMER

Casino first does not mean casino only.

Sports can be the front door. Casino is the activation priority. Rewards connect the relationship.

Follow the preference
Casino first for players who choose casino. Casino offered inside sports for those who do not.

Never add friction
The sports experience gets better first. Casino rides in the gaps: half time, between legs, the off season.

Sources: Product Strategy session

ALREADY IN FLIGHT · THE CORPORATE PRIORITY LIST

We have already started.

Nine of the eleven programs on the corporate priority list already deliver this strategy.

CORE BET 01

Casino-first activation

- Crypto Deposits — In delivery
- Prism — Starting

CORE BET 02

Make it rain

- Jackpots Platform — In delivery
- Promo Revamp — In delivery
- Rakeback — In delivery

ENABLER · CONVERT

Win new bettors

- RAF (refer a friend) — Starting

ENABLER · DISCOVER

A lobby that fits the player

- Casino Discovery & Engagement — Starting

ENABLER · TRUST

Trust, built into every screen

- Login Security & ATO Prevention — Starting

THE FOUNDATION

One view of every player

- FIN AI — Starting

One direction. This strategy does not replace what is in flight. It points all of it the same way.

Source: Corporate priority list, October 2026 · In delivery: stage 9 · Starting: stages 6 to 8

07 · IN WHAT ORDER

Lay the rails. Make it rain. Make it personal.

Now

Lay the rails

Casino-first activation and lobby · Rewards come to life · VIP status match · Trust

- Fast sign up; starter checklist
- Casino-first homepage and lobby
- Persona lobby; better search
- Auto free spins; onboarding rewards
- Rewards brought into the lobby
- Status match; track player sources
- Deep props and same-game parlays
- Trust badges; spend control
- Live payout status and payout time

Next

Make it rain

Rewards every few hours · A lobby that knows you · Casino in sports · Provably fair, faster payouts

- Casino welcome offer, staggered
- Casino in the sports dead time
- Instant rewards, every few hours
- Early VIP challenges; VIP Watchlist
- Spot personas automatically
- Personal lobby; casino in sports
- Community: streams and chat
- Provably Fair; RTP on every slot
- Auto payouts; phone security

Later

Make it personal

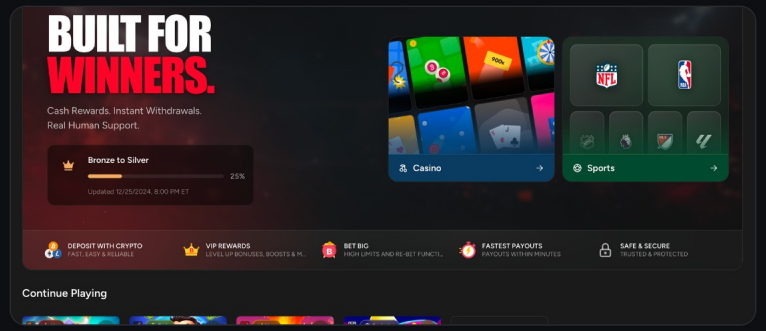

Rewards inside the game · Our own games · Social proof

- Rewards and deposit in the game
- Test our own in-house games
- Live wins feed; shareable receipts

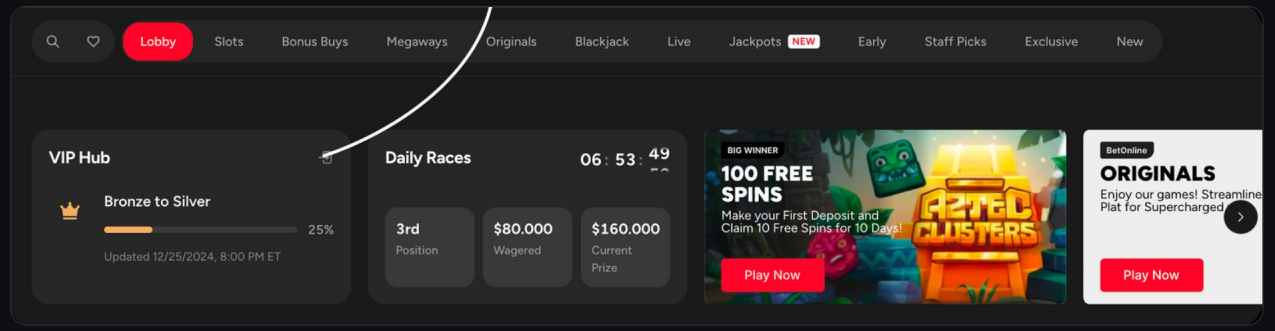

THE FOUNDATION · starts now One rewards ledger · real-time player data · CRM · Independence

IN WHAT ORDER · FIRST DESIGNS

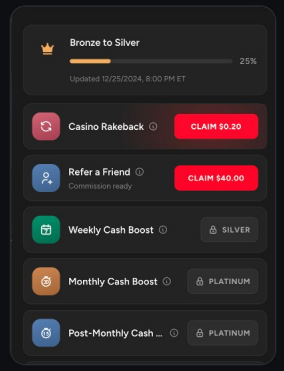

A first look at what we will build.

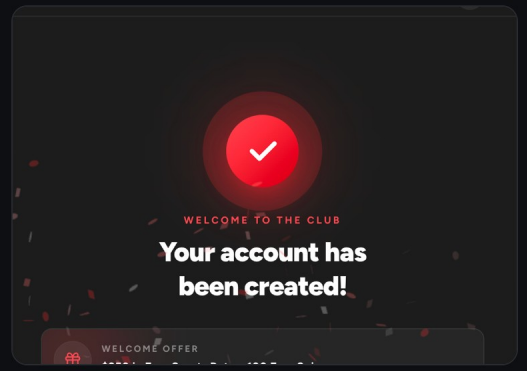

NOW · Casino-first homepage

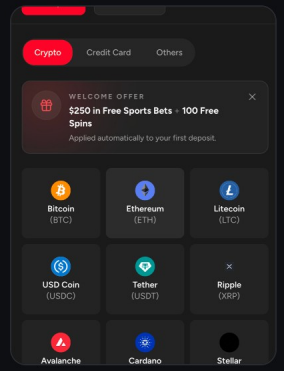

NOW · Rewards brought into the lobby

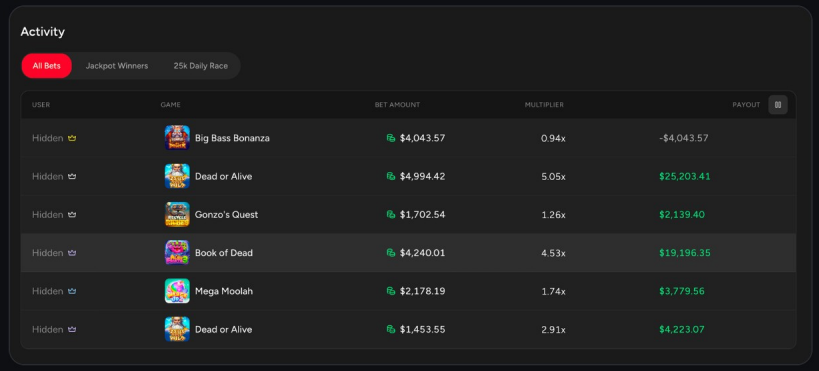

NOW · VIP hub

NOW · Fast sign up

NOW · Cashier

LATER · Live wins feed

Early design concepts by CH's team · not final

08 · THE NEEDLES WE MOVE

What we'll measure.

Where we are today, and where we commit to be.

CASINO ACTIVATION RATE

Sign-ups who bet casino in week one

New → +__ pts

Core bet 01 · Discover

TIME TO FIRST CASINO BET

From cleared deposit to first casino bet

~8 min → <2 min

Core bet 01

WEEK ONE RETENTION

Fast starters still playing after week one

35% → 65%

Core bets 01 and 02

CASINO CHURN WINDOW

How long a casino player stays active

30 days → 60 days

Core bet 02 · 45 days by end of 2027

CASINO NGR

Growth vs FY2026. Casino players bring 65% of NGR

FY2026 → +__ %

All five bets · agree with finance

TRUST CONTACTS

Unpaid-win and fairness contacts per six months

~27.6K → Half

Trust

IN PROGRESS

BEING SET BY THE PRODUCT LEADERSHIP TEAM

Held to it. Every number has one owner, a baseline locked in planning, and a readout every quarter.

Targets proposed by product · dashed: baseline first, agreed with finance in planning · Baselines: journey audit, player base, retention, Voice of the Player

THE SCORECARD · 1 OF 3 · ACTIVATE AND REWARD

The two core bets.

Outcome	KPI	Baseline today	Status
Activation	Time to first casino bet, by stage and channel	~8 min, 8 clicks after deposit	On scorecard
Activation	Week 1 retention	50% of fast starters gone	Team proposed
Activation	14-day graduation rate	To be defined	Team proposed
Activation	Casino activation rate (casino bet in week one)	Not measured	NEW · validate
Activation	Sign-up time and fields	~1:30 and 6 fields	Team proposed
Activation	Sign up to first deposit conversion	Not measured	NEW · validate
Engagement	Time to first reward	To be pulled	Team proposed
Engagement	Reward moments per player per day	Nothing hourly today	Team proposed
Engagement	Rewards delivered automatically and on time	Free spins sent by hand	NEW · validate
Engagement	Casino play days per active player	On department sheet	On scorecard
Engagement	Distinct games played	On department sheet	On scorecard

On scorecard: a department objective today · Team proposed: in a submission, baseline needed · NEW · validate: created for this deck, confirm we can measure it

THE SCORECARD · 2 OF 3 · RETAIN AND GROW VALUE

Keeping players, and growing what they are worth.

Outcome	KPI	Baseline today	Status
Return	Casino churn window	~30 days (hybrid ~60)	Team proposed
Return	30-day return rate	On department sheet	On scorecard
Return	Sports-first players who bet casino (vs control)	78% stay in sports	NEW · validate
Return	Unresolved VIP contacts; credit-decline closures	~9,000 VIP contacts	NEW · validate
Value	NGR per active player	On department sheet	On scorecard
Value	Extra NGR from rewards vs a holdout group	Not measured	NEW · validate
Value	90-day retention of high first-deposit players	Not measured	NEW · validate

On scorecard: a department objective today · Team proposed: in a submission, baseline needed · NEW · validate: created for this deck, confirm we can measure it

THE SCORECARD · 3 OF 3 · ENABLERS AND HOW WE WORK

Convert, discover, trust, and prove it.

Outcome	KPI	Baseline today	Status
Direct entry	FTD conversion, incl. prediction market arrivals	To be pulled	Team proposed
Direct entry	Share of new FTDs from organic and direct	Not measured	NEW · validate
Direct entry	Status matches proven by deposit, then wager volume	New offer	NEW · validate
Discover	Clicks to a casino game, from any page	~50s to find casino	Team proposed
Discover	First casino bet and first-session play, by persona	Not measured	NEW · validate
Trust	Payout time, published and held to	Not published yet	Team proposed
Trust	Unpaid-win contacts and fairness disputes	12,787 and 14,830 in 6 months	NEW · validate
Trust	Churn of account takeover victims vs others	Higher, size to confirm	Team proposed
Efficiency	Money lost to fraud; hours of manual reward work	To be pulled	Team proposed
How we work	Releases with a baseline, control group and verdict	Near zero today	NEW · validate

On scorecard: a department objective today · Team proposed: in a submission, baseline needed · NEW · validate: created for this deck, confirm we can measure it

THE VISION

Every wager does more.

One connected experience. A first casino bet in minutes. A hook that brings players back. Rewards that rain on every wager.

That is how we become the best of the best.
